

About PSI

Since 1959, Packaging Specialties (PSI) has been manufacturing exceptional containers. Our specialized containers have been used throughout the world, ranging from storing nuclear warheads in Russia, to chemicals in China. Our origin is founded in the *Military Standard* container. These drums are known for their severe duty and custom configurations. PSI *Stainless Steel* drums are used to process, ship and store chemicals, pharmaceuticals, fragrances, beverages and flavors. Our *Stainless Steel* drums are known for withstanding harsh environments and for their low maintenance finish. PSI has been manufacturing *Overpack* and *Salvage* drums since the early 60's; they are tested and true. Packaging Specialties is your best source value in long-term reusable containers.
